

I grew up with teletype machines, and have recently gotten one working again. I like to show the kids and their friends what technology was important when I was their age. Efforts like RM-10765 help keep the technology alive and accessable. I could describe what teletype machines and RTTY were like, but when the kids see (smell and hear!) it actually working, it makes all the difference.

I urge you to approve the petition. Thanks.
